Introduction

The Vancouver Fraser Port Authority Land Use Plan is a policy document that provides a framework to manage growth and development of federal port lands and waters for the next 15 to 20 years. It identifies the types of uses that are appropriate within different areas of the port authority's jurisdiction.

From time to time, the port authority purchases new lands, enters into a long-term lease agreement with a landowner, re-designates existing port authority properties, or divests existing port authority properties.

Over the past year, we have divested a portion of road allowance in Vancouver and acquired one site in Richmond and two sites in Surrey.

These acquisitions require our land use plan to be amended, which involves a public engagement period and approval from the port authority's board of directors. For such amendments, the *Canada Marine Act* sets out procedural requirements for public notice, engagement, and adoption by our board of directors.

A map of each amendment site is provided in Figure 1 and Figure 2.

Table 1 provides additional detail about each site, including the former designation and the proposed designation.

Between September 9 and November 8, 2024, we undertook a 60-day engagement period to provide information about the proposed land use plan amendment sites and seek feedback from the community. Activities included public, stakeholder, and First Nations notifications, one online session, and two in-person open houses.

We launched an engagement website, which contained additional resources and sought feedback via an online questionnaire. A hard copy questionnaire was available at the in-person open houses.

All engagement materials were available in English, French and Punjabi both online and in-person.

Figure 1: Overview map of proposed land use plan amendment sites

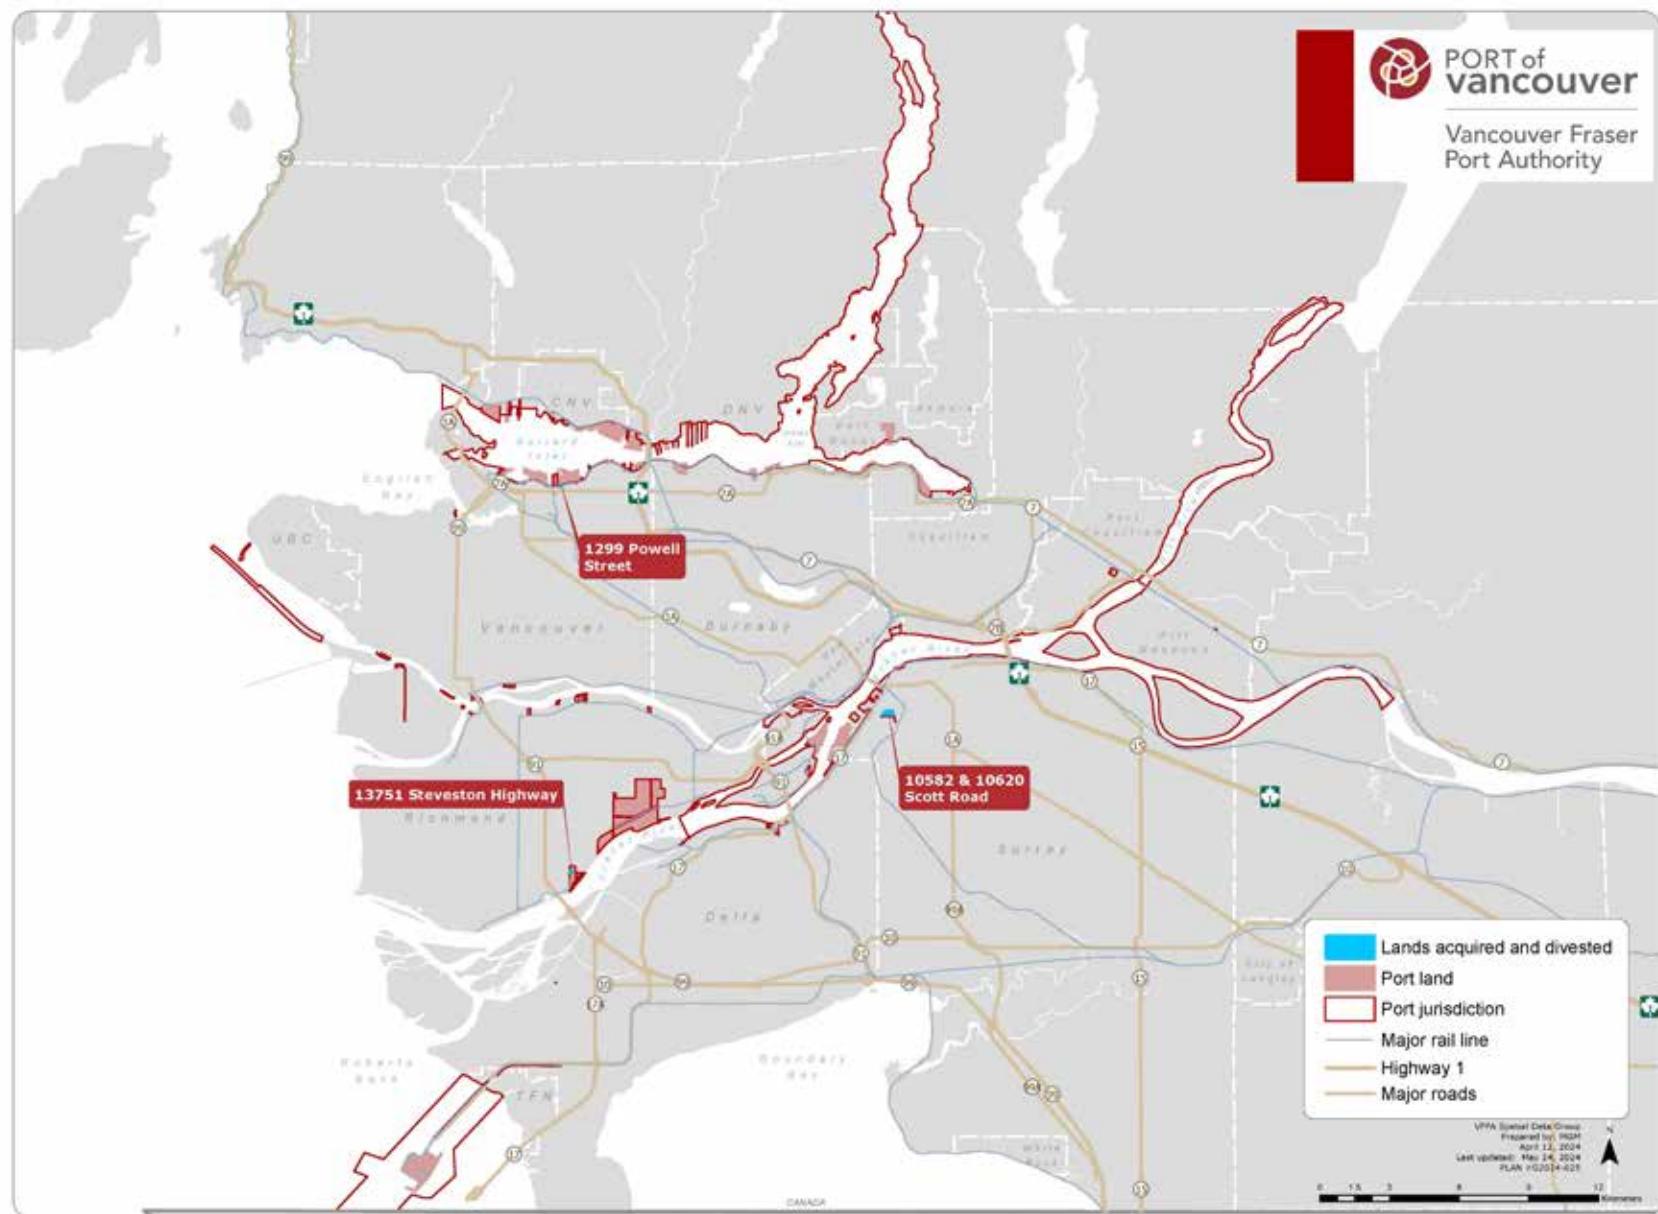

Figure 2: Maps of proposed land use plan amendment sites

1299 Powell Street, Vancouver

Divested, no longer within the port authority's jurisdiction.

13751 Steveston Highway, Richmond

Proposed designation “Industrial”. Former municipal designations “Industrial” and “Commercial”.

10582 and 10620 Scott Road, Surrey

Proposed designation “Industrial”. Former municipal designation “Mixed employment”.

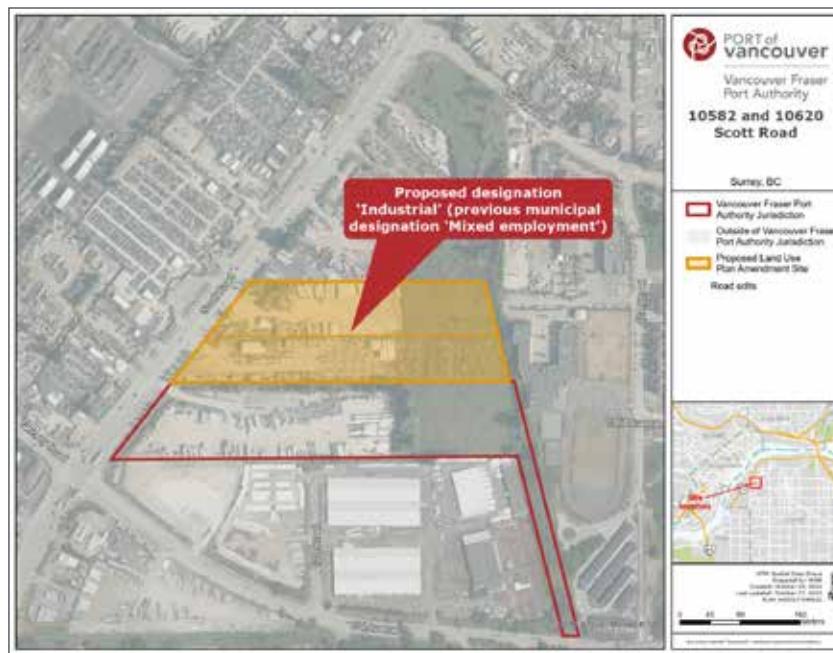

Table 1: Proposed land use plan amendment sites

Amendment type		
Newly acquired land		
Municipality and site	Richmond	Surrey
Site location	13751 Steveston Highway	10582 and 10620 Scott Road
Site area	0.34 ha / 0.84 ac	5.08 ha / 12.56 ac
Current use	Vacant	Temporary truck/chassis parking
Anticipated future use	Site access to facilitate industrial development of an existing property	Large format logistics warehouse
Former municipal zoning	IL – Light Industrial and CEA – Entertainment & Athletics	General Agriculture (A-1)
Former municipal land use designation	Industrial and commercial	Mixed employment
Proposed land use plan designation	Industrial	Industrial
Date of acquisition/tenure agreement	July 13, 2023	10582 – June 11, 2024 10620 – June 17, 2024

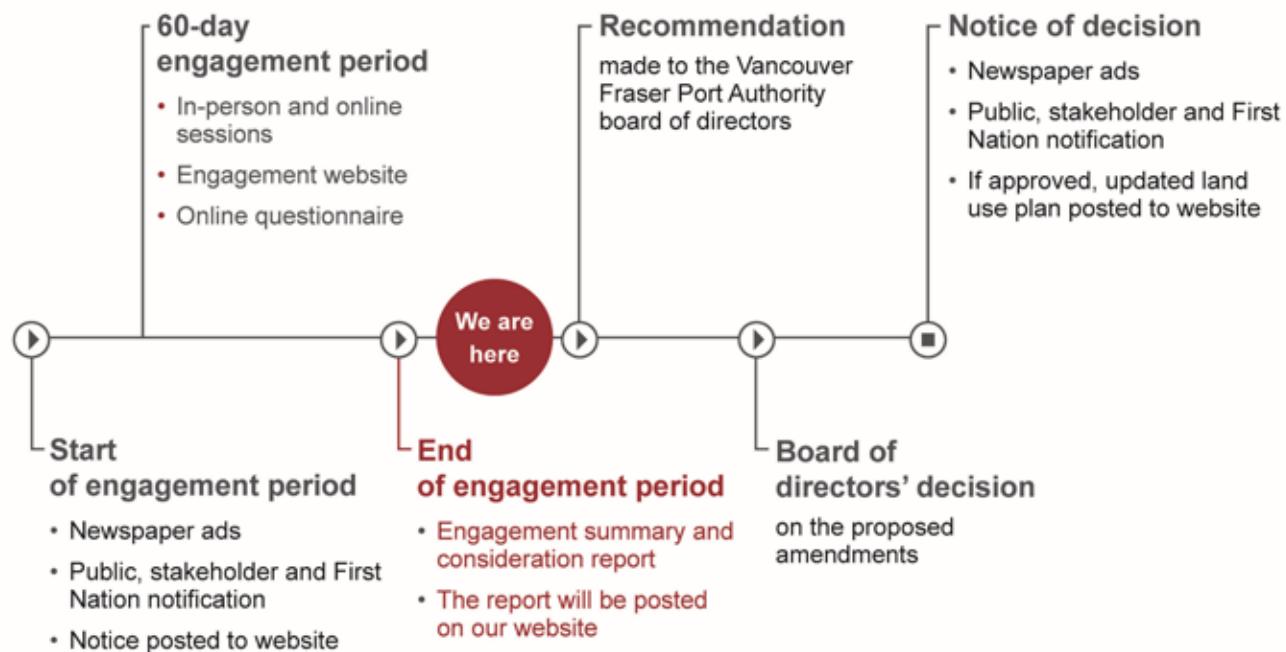

Land use plan amendment process

Substantive or major amendments to the land use plan may include new site acquisitions, divestments or changes to existing port authority land use designations. For these amendments, the *Canada Marine Act* sets out the procedural requirements for public notice, engagement and adoption by the port authority board of directors.

To satisfy the requirements of the process laid out in the *Canada Marine Act*, we undertook a 60-day engagement period to seek input from the public, First Nations, and stakeholders on the proposed land use plan amendments. We

reviewed and considered all feedback received during the engagement period and are preparing to make a recommendation to our board of directors to approve the proposed amendments to the land use plan.

Figure 3: Land use plan amendment process

Engagement process

Activities specific to the amendment engagement process included:

- 1**
online session*

- 1**
dedicated engagement website in English, French and Punjabi

- 2**
in-person open houses

Feedback opportunities included:

- 1**
dedicated email address

- 2**
questionnaire formats - one online and one hard copy, in English, French and Punjabi

*An online session was offered in French, with a sign up date of September 21. No preregistering occurred therefore the session was not run.

3.1 Notification methods and materials

Details of notification methods and materials used are summarized below. More details can be found in Appendix A.

3.1.1 Notification letters

Between August 20 and August 26, 2024, notification mailers were mailed to adjacent property owners, residents, and businesses within 500 metres of the proposed amendment sites in Richmond and Surrey. The notices were delivered to 2,411 recipients. Maps of the notification areas are provided in Figures 4 and 5.

Figure 4: Notification area 13751 Steveston Highway, Richmond

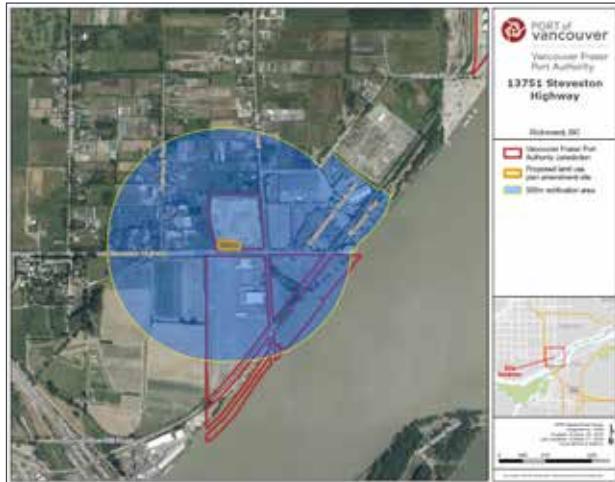

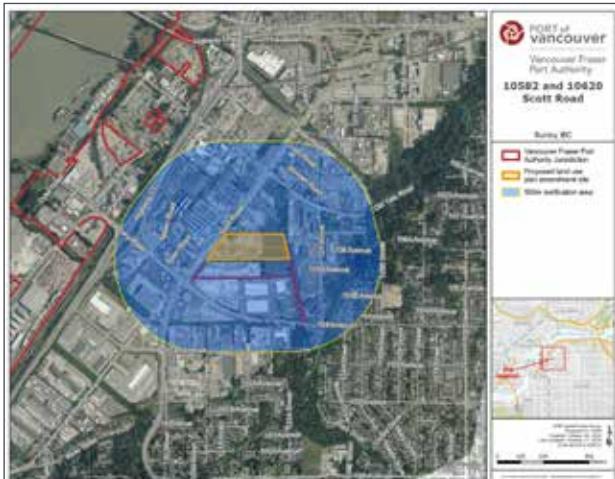

Figure 5: Notification area 10582 and 10620 Scott Road, Surrey

On August 26, 2024, the port authority sent stakeholder notification letters to the City of Vancouver, City of Richmond, City of Surrey, Metro Vancouver, and the B.C. Ministry of Transportation and Infrastructure. Letters were also sent to the following tenants and stakeholders: WWS Vehicle Services Canada, Saltworks Technologies Inc., and Khalsa Secondary School.

The public and stakeholder notifications included information about the proposed amendments, as well as an invitation to attend the online sessions or one of the in-person open houses, and to provide feedback through the online questionnaire or dedicated email.

On August 26, 2024, the port authority sent a notification email package to all First Nations whose traditional territories overlap the proposed land use plan amendment sites, 15 First Nations in total. These emails included the information described in Table 1, an invitation to attend the online sessions or in-person open houses, and to provide feedback through the online questionnaire, as well as the opportunity to contact the port authority directly to discuss the proposed land use plan amendments. First Nations were also provided with an overview map identifying the proposed land use plan amendment sites.

3.1.2 Updates to the port authority website

Information updates on the process were provided on the port authority website at the beginning of the public engagement period. Each web page included information about the proposed amendments and directed the public to the engagement website as a primary engagement tool and source of information. Details can be found in Appendix A.

3.1.3 Email notification

Notification emails were sent on September 9, 2024, to 1,076 subscribers along with a follow-up email on October 25, 2024.

The emails contained information about the proposed amendments, instructions on how to participate in the engagement and how to provide feedback.

3.1.4 Newspaper advertisements

Newspaper advertisements were placed in four local newspapers on the following dates:

- August 20, 2024: La Source
- August 25, 2024: The Province
- August 26-30, 2024: Richmond News (online)
- August 29, 2024: Surrey Now-Leader

3.1.5 Social media posts

Between August 26 and November 8, 2024, advertisements were shared on the port authority's Facebook and Instagram pages. There were also 11 organic posts shared on the port authority's X (formerly Twitter), Facebook, Instagram and LinkedIn pages. Sample social media posts are available in Appendix A.

3.2 Engagement activities and materials

Details of each engagement activity and materials used are summarized in the following sections. Samples are provided in Appendix A.

3.2.1 Dedicated engagement website

A dedicated engagement website for the proposed land use plan amendment was developed on CivilSpace. It included general information about the proposed amendment sites and how to participate. The website officially launched at the start of the engagement period on September 9, 2024 but was live from August 19 to coincide with the arrival of the notifications and the first print advertisement.

The engagement website was designed as both an information-sharing tool for the amendment process, and as an online engagement platform. It included information about the following:

- The Vancouver Fraser Port Authority Land Use Plan and the amendment engagement process
- The proposed land use plan amendment sites
- An online questionnaire
- Instructions on how to register for the online sessions
- Information about the in-person open houses
- Engagement materials, e.g., backgrounder, presentation slides, overview map of proposed amendment sites, recording of the online session

The engagement website provided different ways for the public to ask questions and provide feedback on the proposed amendment sites.

The engagement website and all supporting documents were available in English, French and Punjabi.

3.2.2 Online session

The online session was designed to encourage residents and business owners near the proposed amendment sites, First Nations, stakeholders, and interested parties to register and learn about the proposed land use plan amendment sites and share their input.

The English session was scheduled for and occurred on Wednesday, September 11, 2024 from 6:30 to 7:30 p.m. via Zoom.

The French session was scheduled for Wednesday, October 9, 2024 from 6:30 to 7:30 p.m. via Zoom.
The session was ultimately not run due to no participant registration.

Registration instructions were provided in the notification materials and hyperlinks to register for the session were provided on the engagement website. After providing their name and email address, registrants received an email with a link and instructions on how to join the session.

At the online session, port authority staff delivered a presentation and held an interactive question and answer session.

The presentation slides for the online session were based on the open house boards and have not been provided within this document. A recording of the session was posted to the engagement website on September 12, 2024 and is available to view [here](#). As of November 8, 2024 the video had been viewed 128 times.

3.2.3 Online and hard copy questionnaire

The questionnaire was designed to be filled out either online, or in-person at the open houses.

The public was encouraged to provide feedback on each of the proposed amendment sites, as well as provide general information to indicate their community and whether they attended the online session or in-person open houses.

The online questionnaire was open between September 9 and November 8, 2024. Hard copies were handed out at the open houses. Attendees who attended the online session were encouraged to complete the online questionnaire if they had additional input to share.

3.2.4 Dedicated email

A dedicated email address (LandUsePlan@portvancouver.com) complemented the digital engagement activities, and provided an alternative method for the public to ask questions and provide their input throughout the public engagement period.

Summary of public, First Nations, and stakeholder participation

During the 60 day engagement period, there were a total of 9,182 participant interactions, including:

3,383

page views on the project website

8

in-person open house attendees

4,583

social media link clicks

213

submissions from members of the public

987

unique email views

2

written submissions from stakeholders

6

digital information session attendees

0

responses from First Nations

4.1 Feedback from the public

A total of 213 submissions were received from members of the public including:

- 208 online questionnaire responses
- One hard copy questionnaire response
- One email submission
- Three questions raised during the online session

See Table 2 (pages 16 to 18) for more details on the feedback received and the port authority responses and considerations.

4.1.1 Online session

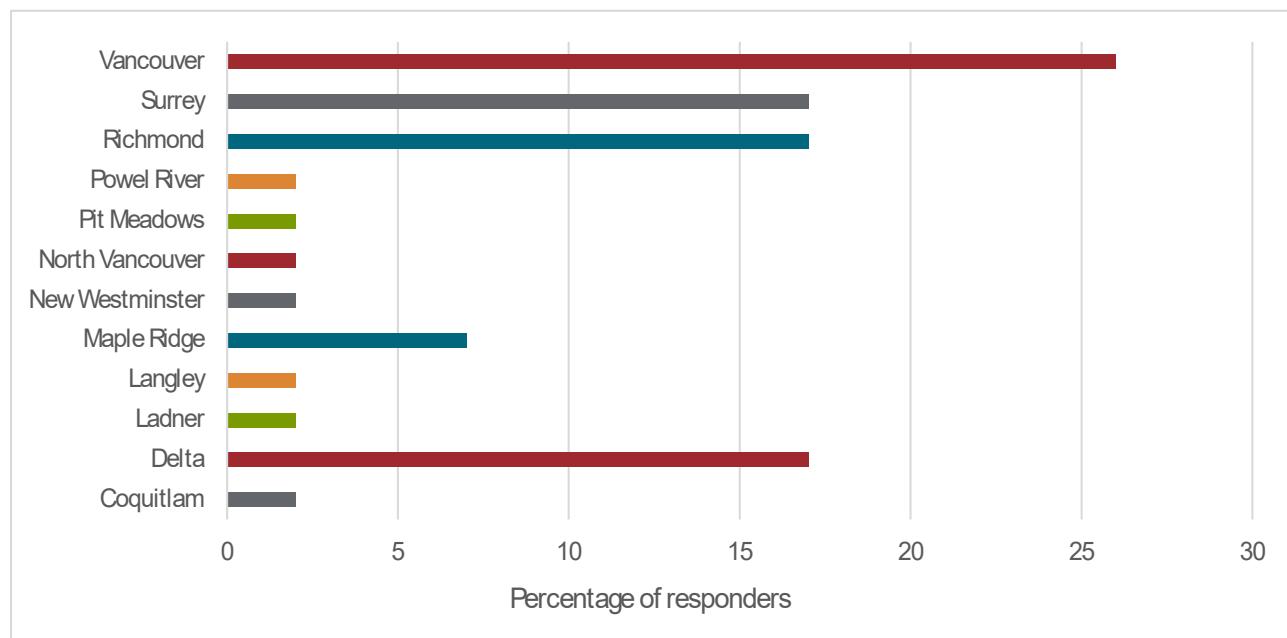

Thirteen people registered with six people attending the English online session on September 11, 2024. Three questions were asked and answers provided during the session. The recording of the session was posted to the engagement website on September 12, 2024 and has received 127 views by November 8, 2024.

4.1.2 Online and hard copy questionnaire

A total of 209 partially complete or completed responses were received, 83 of which contained specific feedback on the proposed amendment sites. Questionnaire responses were anonymous, and no contact information was requested. A number of demographic and identifying questions were asked to assist in future promotional activities for the land use plan amendment process. Not all questions were answered by all respondents.

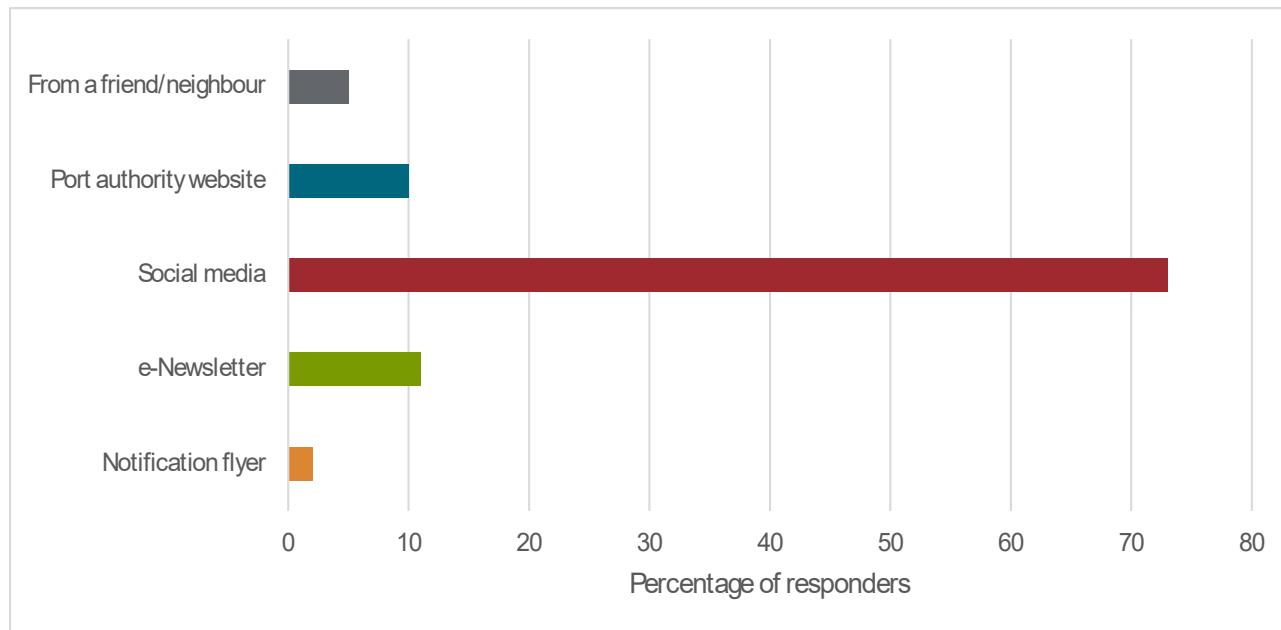

For those who completed the question regarding where they lived, all but one self-identified as living in the Lower Mainland. This was further broken down into 11 municipalities as detailed in Figure 6.

Figure 6: Where do you live?

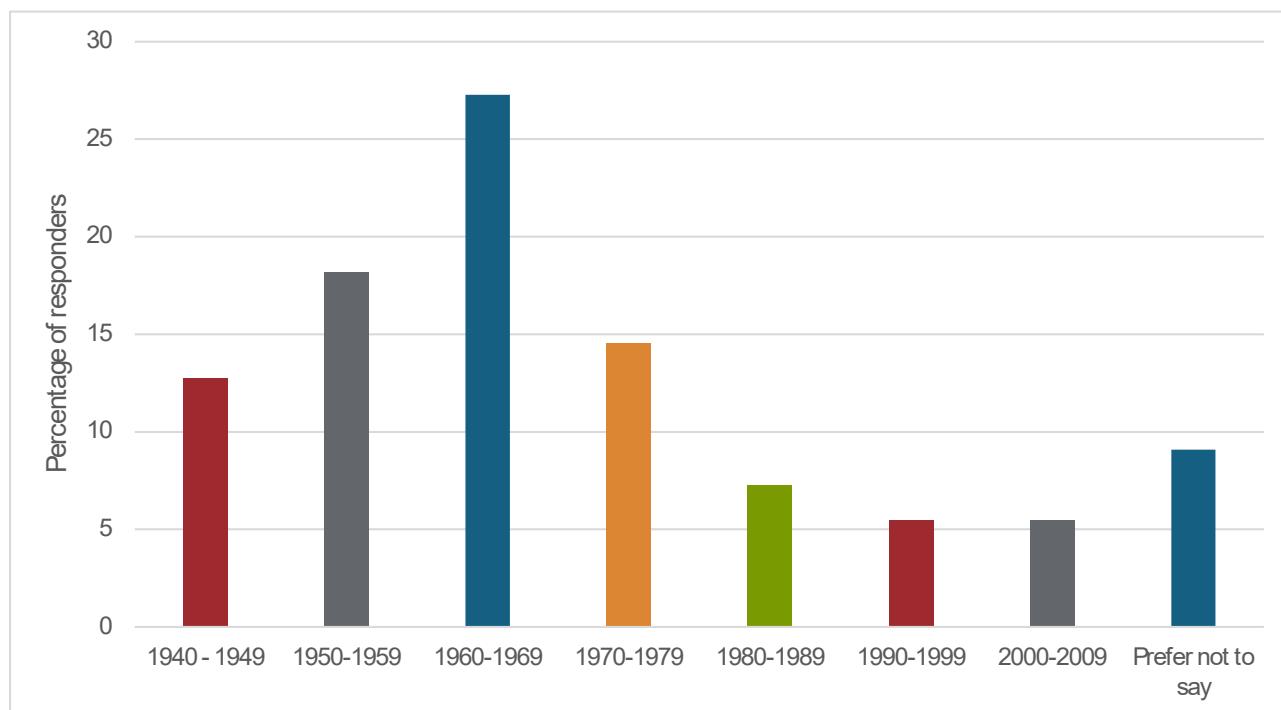

The majority of respondents were informed of the engagement via social media ads, a detailed breakdown of how notifications were received is detailed in Figure 7.

Figure 7: How did you hear about the engagement?

Respondents self-identified as 35 percent female, 59 percent as male, and 6 percent preferred to self-identify. A breakdown of the age range of respondents can be found in Figure 8, with those born between 1960-1969 providing the most input.

Figure 8: Decade of birth

4.1.3 Email

A dedicated email address was open for public input throughout the engagement process. One email submission was received.

4.1.4 Public feedback, responses, and considerations

The following provides a summary of input received from all sources, including the online and hard copy questionnaire, questions raised at

the online sessions, and via email. All feedback is included in this engagement summary and consideration report. The report will be provided to the port authority's board of directors for review to inform the decision on the proposed amendments and will be posted on our website once the decision is finalized. To respect the anonymity and confidentiality of participants, feedback received has been grouped into themes.

Table 2: Public feedback

Overall comments received from the public were supportive of the proposed amendments or focused on questions relating to process, future uses, impacts from any potential future development on communities, the environment, and the transportation network and traffic, as well as calls for green spaces and concerns over potential loss of farmland. Additional comments received beyond the scope of this process included requests for port policing and the installation of container scanners within the Port of Vancouver.

Comments
Land use planning amendment process and future uses: comments received included requests for clarification on process and First Nations engagement, future anticipated uses, information on the process to provide feedback on future potential development applications for each site and the timing of the port authority's broader land use plan review process.

Port authority answers and/or considerations

Process and uses

The land use plan amendment process is a yearly process to facilitate the formal designation of newly acquired lands within the jurisdiction of the port authority and to remove divested lands that are no longer within the port authority's jurisdiction.

When the port authority acquires or purchases new land, we are required to provide it with a port authority land use designation. All three sites this year are proposed to be designated as "Industrial". The sites are anticipated to be used for trade-oriented industrial development and supporting infrastructure. Also, this year, a portion of road allowance was divested in Vancouver and is no longer within our jurisdiction. This process provides notification of this change. Between September 9 and November 8, 2024, the port authority engaged with 15 First Nations, stakeholders and the public on our proposed land use plan amendments.

An "Industrial" designation, as defined in our land use plan, is intended for light to heavy industrial activities in support of port operations and marine support services, including goods shipping, transportation, handling, and, in some cases, manufacturing. Primary uses may include intermodal yards, warehouses, container storage facilities, transloading facilities, ship repair, and barge moorage activities. Ancillary uses may include offices, storage areas, and other uses required to support the primary use. Each of these sites are intended for future industrial warehouse development.

The three sites in this year's amendment process held prior municipal land use designations to identify the intended future uses of the sites. The Richmond site was zoned IL – Light Industrial and CEA – Entertainment & Athletics and its intended future use was "Industrial" and "Commercial".

The Surrey sites were zoned as General Agriculture (A-1) but held a "Mixed employment" municipal land use designation. The two sites in Surrey have not been used for agricultural purposes and are currently being used for temporary truck/chassis parking.

Future development application process

Any future development proposal is subject to the port authority's Project and Environmental Review (PER) process and includes further consultation opportunities to provide feedback during this process. All projects undertaken within the port's jurisdiction (with the exception of Category A and some B permits) require posting to the *Canadian Impact Assessment Act* registry which provides a 30-day public comment period prior to any decisions being made.

For the **13751 Steveston Highway, Richmond**, the site is anticipated to be consolidated with the adjacent port authority property to facilitate an industrial warehouse development. No application has been received to date.

For more information on our PER process, visit our website: <https://www.portvancouver.com/permits-landing-page>

For the **10582 and 10620 Scott Road, Surrey**, the sites are intended to be consolidated with the existing port authority property to facilitate an industrial warehouse development.

The future proposed development is undergoing a PER review at this time and information can be found on the port authority website should you wish to provide feedback on the proposed development application: <https://www.portvancouver.com/permit/brunswick-property-holdings-surrey-ltd-distribution-logistics-facility>

Broader 5-year land use plan review

Every Canadian port authority is required to have a land use plan, as outline in the *Canada Marine Act*. The port authority undertakes a comprehensive review approximately every five years. Our last engagement period to update our plan occurred in 2019 and 2020. The plan was adopted by our board of directors in December 2020. Our next comprehensive review is anticipated to commence either late in 2025 or early 2026. Details on the engagement process will be posted on our website including how to participate at the launch of this process.

Comments

Comments were received regarding the potential impacts future development may have on communities, the environment, wildlife and fish, the transportation network and traffic, as well as suggestions to incorporate active transportation measures in any future proposal.

Port authority answers and/or considerations

Consideration of potential impacts from future developments

One of our roles as a port authority is to consider the environment and communities when determining future proposed development projects. Through our PER process, we carefully review

and consider potential effects from all proposed project development on federal lands and waters, and neighbouring communities before determining if a project should proceed. Any proposed project on lands and waters within the port authority's jurisdiction cannot begin work unless we issue a permit. Environmental, community, and transportation (access and traffic impacts) are considered as part of the PER process for each proposed development. For more information on our PER process, visit our website: <https://www.portvancouver.com/permits-landing-page>

Information can be found on the port authority website should you wish to provide feedback on the proposed development application at **10582 and 10620 Scott Road, Surrey** currently under PER review <https://www.portvancouver.com/permit/brunswick-property-holdings-surrey-ltd-distribution-logistics-facility>

Comments

Additional comments beyond the scope of the land use plan amendment process included requests for port policing and the installation of container scanners within the Port of Vancouver.

Port authority answers and/or considerations

Security and policing at B.C. marine terminals

There are 29 different law enforcement and regulatory agencies that are involved in various aspects of port-related policing and security. We work closely with local police forces and the RCMP, terminal operators and the Canada Border Services Agency (CBSA) to ensure the safety and security of the port - including information and intelligence sharing and maintaining strong ongoing working relationships and training opportunities.

The port authority also supported the creation of a \$42-million CBSA container inspection facility in Tsawwassen.

Request for container scanners within the Port of Vancouver

CBSA has a mandate to ensure that all goods entering Canada do not pose a risk to the health, safety, and security of Canadians, while facilitating the free flow of legitimate goods.

The vast majority of marine containers shipments are processed and authorized by the CBSA to enter Canada without delay. A small percentage of containers are selected by the CBSA for examination, based on a comprehensive risk assessment and random selection, using state of the art technology to facilitate the examination process.

There are two such facilities in the Lower Mainland: one located in Tsawwassen and the other in Burnaby.

4.2 Feedback from stakeholders

During stakeholder engagement, response letters were received from Metro Vancouver and the City of Richmond. The City of Vancouver, City of Surrey, the B.C. Ministry of Transportation and Infrastructure, WWS Vehicle Services Canada, Saltworks Technologies Inc., and Khalsa Secondary School did not respond.

Table 3 summarizes the stakeholder feedback received, as well as responses and considerations from the port authority.

Table 3: Stakeholder feedback

Stakeholder: Metro Vancouver		
Proposed amendment site	Comments and questions received	Port authority answers and/or considerations
13751 Steveston Highway, Richmond	No comment	None required
10582 and 10620 Scott Road, Surrey		
Stakeholder: City of Richmond		
Proposed amendment site	Comments and questions received	Port authority answers and/or considerations
13751 Steveston Highway, Richmond	Reminder to communicate with the City of Richmond during any future development of the site, as per the negotiated sale agreement with the City of Richmond at the original point of sale.	<p>Noted</p> <p>The port authority will continue to communicate with the City of Richmond on future developments of the site.</p>

4.3 Feedback from First Nations

The port authority engaged with 15 First Nations to provide an opportunity for groups to provide input and discuss their rights and interests with

respect to the proposed amendments. The port authority received no responses from First Nations.

2. Stakeholder letter and notice of amendment

Vancouver Fraser
Port Authority

Grant Smith
Operations Manager
BC Ministry of Transportation and Infrastructure (MoTI)
Suite 310 - 1000 Woodridge Street
Coquitlam, BC V3K 0B9

Re: [Invitation to comment: Proposed annual amendments to the Vancouver Fraser Port Authority's Land Use Plan](#)

Dear Grant Smith:

The Vancouver Fraser Port Authority (port authority) is the federal agency responsible for the stewardship of the Port of Vancouver. We operate pursuant to the [Canada Marine Act](#), with the mandate to enable Canada's trade objectives through the Port of Vancouver, ensuring goods are moved safely, while protecting the environment, and considering local communities. Our [Land Use Plan](#) outlines related goals, objectives and policy directions to help us meet this mandate with the development and use of port lands and waters. In fulfilling our mandate, the port authority also seeks to protect trade-oriented lands within the region to ensure sufficient land is available to support the trade needs of future generations of Canadians.

Under the Canada Marine Act, a port authority must amend its land use plan to remove any divested land, add newly acquired sites, or change the designation on existing lands. The formal amendment process includes procedural requirements for public notice, consultation, and adoption by our board of directors.

Proposed land use plan amendments

Over the past year, the port authority has acquired one site, consisting of two lots, in Surrey and one site in Richmond, which we propose to designate and add to our Land Use Plan. Additionally, the port authority has divested a portion of road allowance in Vancouver that will be removed from our Land Use Plan, as it is no longer under port authority jurisdiction.

The proposed amendments are as follows:

- 10082 and 10620 Scott Road, Surrey – newly acquired site, proposed designation "Industrial"
- 13751 Steveston Highway, Richmond – newly acquired site, proposed designation "Industrial"
- 1299 Powell Street, Vancouver – divested site, no longer under port authority jurisdiction (a portion of road allowance adjacent to 1299 Powell Street, Vancouver).

Any proposals for future development of these sites would be subject to the port authority's [Project and Environmental Review](#) process and must conform to the uses permitted under the land use plan.

PORT of Vancouver | Vancouver Fraser Port Authority

Notice of Land Use Plan Amendments
September 9 to November 8, 2024

Annual land use plan amendment process

The Vancouver Fraser Port Authority (port authority) is an arms-length federal agency that stewards the lands and waters of the Port of Vancouver. We operate pursuant to the *Canada Marine Act* with a mandate to facilitate Canada's trade objectives through the Port of Vancouver, ensuring goods are moved safely, quickly, and considering local communities.

We manage federal lands and waters in support of national trade objectives for the benefit of all Canadians. Geographically, the Port of Vancouver includes more than 16,000 hectares of water, over 1,500 hectares of land, and approximately 350 kilometres of shoreline. Located on the southwest coast of British Columbia, the Port of Vancouver borders 16 municipalities and intersects the traditional territories and treaty lands of 35 Coast Salish First Nations.

In 2020, we updated our land use plan, which provides a framework for development and use of port lands and waters for the next 15 to 20 years.

Under the *Canada Marine Act*, the port authority must amend its land use plan to remove any divested land, add newly acquired sites or change the designation on existing sites. This requires the port authority to outline the intended use of such changes through a formal land use amendment process.

Proposed land use plan amendments

Over the past year, the port authority has acquired one site, consisting of two lots, in Surrey and one site in Richmond, which we propose to designate and add to our land use plan. Additionally, the port authority has divested a portion of road allowance in Vancouver that will be removed from our land use plan, as it is no longer under port authority jurisdiction.

We propose to designate the following sites with an appropriate port authority land use designation (see details on the proposed designations on the following page).

- Newly acquired sites:
 - 10582 and 10620 Scott Road, Surrey
 - 13751 Steveston Highway, Richmond

3. Land use planning web page

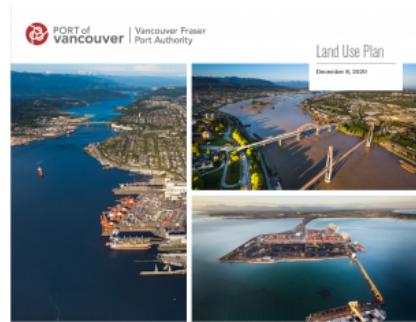

Land use planning

As the port authority responsible for Canada's largest port, it is our job to carefully balance multiple priorities and interests across our jurisdiction. Part of this responsibility means managing—on behalf of all Canadians and in support of national trade—the federal lands and waters that make up the Port of Vancouver.

Similar to a municipality's official community plan, our [Land Use Plan](#) guides the long-term development and use of port lands and waters over the next 15 to 20 years.

The purpose of our land use plan is to:

- Communicate the direction of our long-term land use policy directions
- Guide land use and future growth opportunities
- Help current and future port tenants and customers identify areas in which to invest in new or intensified operations
- Facilitate coordination of land use and transportation planning with neighbouring communities and government agencies
- Provide neighbouring residents and communities with greater clarity about activities and uses that may occur on port lands and waters, and how community interests will be considered
- Provide clarity to Indigenous groups about activities and uses that may occur on port lands and waters adjacent to reserves and within asserted traditional territories, and how Indigenous interests will be considered

As trade growth continues, we acquire land to support future port-related activities. We focus on sites with easy access to shipping channels, truck routes, or rail corridors, and close proximity to existing port holdings. Making strategic land acquisitions is one of the ways we ensure the Port of Vancouver is ready to handle growing trade.

Under the [Canada Marine Act](#), the Vancouver Fraser Port Authority must amend the land use plan to remove any divested land and add newly-acquired sites, and we must outline the intended use of new land through a formal notice. The plan was most recently updated and adopted by the port authority's board of directors in December 2020.

Land Use Plan yearly amendments

The Vancouver Fraser Port Authority makes annual amendments to our land use plan. This process includes a 60-day public consultation period. Once the amendments are adopted by the port authority's board of directors, a notice of decision is posted and advertised across the region.

2024 Land use plan amendment

The port authority has acquired three sites over the past year, one site in Richmond and two sites in Surrey. The port authority has also divested a portion of road allowance in Vancouver. We propose to designate the newly acquired sites with an appropriate port authority land use designation. A 60-day public, stakeholder and First Nations engagement process will be held between **September 9 and November 8, 2024**.

Details about the three sites, engagement opportunities and how to participate, both in-person and online, can be found on our [engagement website](#).

Past amendments

[2023 Consultation summary report](#) and [Notice of decision](#)

4. Information updates web page

Public engagement begins on proposed land use plan amendments in Richmond and Surrey

September 9, 2024

The Vancouver Fraser Port Authority has started public engagement on proposed amendments to its land use plan, with the community invited to attend an open house, join an online session or visit the port authority website to learn more and provide feedback.

Under the *Canada Marine Act*, the port authority must amend its land use plan to remove divested land, add newly acquired sites or change the designation on existing lands.

The proposed amendments are:

Acquired sites added to the land use plan

- 13751 Steveston Highway, Richmond
- 10582 Scott Road, Surrey
- 10620 Scott Road, Surrey

Divested site removed from the land use plan

- 1299 Powell Street, Vancouver

The public engagement period will take place from September 9 to November 8, 2024.

For details on how to participate visit: www.portvancouver.com/LandUsePlanAmendments

Début de la consultation du public au sujet des modifications du plan d'utilisation des sols à Richmond et Surrey

septembre 9, 2024

L'Administration portuaire Vancouver-Fraser a entamé un processus de consultation du public sur les modifications proposées à son plan d'utilisation des sols. La communauté est invitée à assister à une journée portes ouvertes, à participer à une séance en ligne ou à consulter le site Web de l'Administration portuaire afin d'en savoir plus et de faire part de ses commentaires.

En vertu de la *Loi maritime du Canada*, l'Administration portuaire doit modifier son plan d'utilisation des sols afin de supprimer tout terrain cédé, d'ajouter les nouveaux sites acquis ou de modifier la désignation des terrains existants.

Les modifications proposées sont les suivantes :

Sites acquis ajoutés au plan d'utilisation des sols

- 13751, autoroute Steveston, Richmond
- 10582, route Scott, Surrey
- 10620, route Scott, Surrey

Site cédé supprimé du plan d'utilisation des sols

- 1299, rue Powell, Vancouver

La période de mobilisation du public s'étendra du 9 septembre au 8 novembre 2024.

Pour obtenir des détails sur la façon de participer, consultez le site www.portvancouver.com/LandUsePlanAmendments.

PORT of Vancouver | Vancouver Fraser Port Authority

Notice of land use plan amendment

Under the [Canada Marine Act](#), the Vancouver Fraser Port Authority must amend its [land use plan](#) to remove any divested land, add newly acquired sites or change the designation on existing lands. The formal amendment process requires public notification and engagement.

Over the past year, the port authority has divested one site in Vancouver and acquired three sites: one site in Richmond and two sites in Surrey. The three new sites require a port authority land use designation.

Public engagement on this year's amendments will take place from **September 9 to November 8, 2024**.

Proposed amendments

The port authority will be engaging on three newly acquired sites this year. The proposed designations are as follows:

- The site acquired in Richmond is proposed to be designated as "Industrial"
- The two sites in Surrey are proposed to be designated as "Industrial"

13751 Steveston Highway, Richmond

Proposed designation "Industrial" (former municipal designations "Industrial" and "Commercial")

10582 and 10620 Scott Road, Surrey

Proposed designation "Industrial" (former municipal designation "Mixed employment")

How to participate

We invite you to provide your feedback by attending one of our in-person open houses or our online sessions. Details can be found below.

You can also complete our [online questionnaire](#) (live September 9, 2024) or send an email to LandUsePlan@portvancouver.com.

As part of the amendment process, the port authority will advertise in local newspapers and on social media, and notify neighbours in the surrounding areas, as well as municipalities, stakeholders and First Nations.

Please provide your feedback on the proposed amendments by **November 8, 2024**.

Visit portvancouver.com/LandUsePlanAmendments to:

- Learn more about the proposed land use plan amendments
- Read the land use plan
- Fill out the online questionnaire (live from September 9 to November 8, 2024)

About our land use plan

The Vancouver Fraser Port Authority is the federal agency responsible for the stewardship of the Port of Vancouver. Our mandate, as outlined in the [Canada Marine Act](#), is to enable Canada's trade objectives on behalf of all Canadians, ensuring goods are moved safely through the Port of Vancouver, while protecting the environment and considering local communities.

All Canada Port Authorities are required to have a land use plan, which is a high-level policy document and framework to guide the development of land and waters managed by the port authority for the next 15 to 20 years. It identifies the types of uses that are appropriate within different areas of the port authority's jurisdiction.

The Vancouver Fraser Port Authority's board of directors adopted the most recent land use plan in December 2020.

Read more about our approach to [land use planning](#).

Version française

Avis de modification du plan d'utilisation des sols

En vertu de la [Loi maritime du Canada](#), l'Administration portuaire Vancouver-Fraser doit modifier son [plan d'utilisation des sols](#) afin de supprimer tout terrain cédé, d'ajouter des sites nouvellement acquis ou de modifier la désignation des terrains actuels. La procédure officielle de modification nécessite la notification et la participation du public.

Au cours de la dernière année, l'administration portuaire a cédé un site à Vancouver et acquis trois sites, un à Richmond et deux à Surrey. Les trois nouveaux sites exigent une désignation d'utilisation des sols par l'administration portuaire.

Cette année, la participation du public au sujet des modifications proposées se fera du **9 septembre au 8 novembre 2024**.

Modifications proposées

Cette année, les modifications proposées par l'administration portuaire concernent trois sites, un à Richmond et deux à Surrey. La désignation de site « industriel » est proposée pour les trois sites.

5. Email notifications, continued

13751 Steveston Highway, Richmond

Désignation proposée de site « industriel » (les anciennes désignations municipales des sites étaient « industriel » et « commercial »)

10582 et 10620 Scott Road, Surrey

Désignation de site « industriel » proposée (l'ancienne désignation municipale était « utilisation mixte »)

Comment participer

Nous vous invitons à nous faire part de vos commentaires en participant à l'une de nos séances portes ouvertes en personne ou à l'une de nos séances en ligne. Vous trouverez des renseignements ci-dessous.

Vous pouvez également remplir notre [questionnaire en ligne](#) (à partir du 9 septembre 2024) ou envoyer un courriel à l'adresse plandutilisationdesols@portvancouver.com.

Dans le cadre du processus de modification, l'administration portuaire fera de la publicité dans les journaux locaux et sur les médias sociaux, et elle avisera les voisins des environs, ainsi que les municipalités, les intervenants et les Premières Nations.

Veuillez nous faire part de vos commentaires sur les modifications proposées d'ici le **8 novembre 2024**.

Consultez portvancouver.com/AmendementsPlanUtilisationDesSols pour :

- En savoir plus sur les modifications proposées au plan d'utilisation des sols.

À propos de notre plan d'utilisation des sols

L'Administration portuaire Vancouver-Fraser est l'organisme fédéral responsable de la gestion du port de Vancouver. Notre mandat, tel que stipulé dans la [Loi maritime du Canada](#), consiste à favoriser l'atteinte des objectifs commerciaux du Canada au nom de toute la population canadienne en veillant à ce que les marchandises soient acheminées en toute sécurité par le Port de Vancouver, tout en protégeant l'environnement et en tenant compte des collectivités locales.

Toutes les administrations portuaires du Canada sont tenues de disposer d'un plan d'utilisation des sols. Il s'agit d'un document stratégique de haut niveau et d'un cadre destiné à orienter le développement des terres et des eaux gérées par l'administration portuaire pour les 15 à 20 prochaines années. Il précise les types d'utilisations qui conviennent aux différentes zones qui relèvent de l'administration portuaire.

Le conseil d'administration de l'Administration portuaire Vancouver-Fraser a adopté le plus récent plan d'utilisation des sols en décembre 2020.

En savoir plus sur notre approche à l'égard de la [planification de l'utilisation des sols](#).

PORT of Vancouver
Vancouver Fraser Port Authority

Proposed land use plan amendments
Engagement period
September 9 to November 8, 2024

The Vancouver Fraser Port Authority intends to amend its land use plan to remove one divested site and designate three sites which have been acquired over the past year, one site in Richmond and two sites in Surrey. The newly acquired sites are proposed to be designated as "Industrial" within the port authority's land use plan.

How to participate

Attend an online session or one of our in-person open houses:

English online session: Wed., Sept. 11, 6:30 to 7:30 p.m.
Open house 1: Wed., Sept. 18, 5 p.m. to 8 p.m. at Holiday Inn Express & Suites Riverport, Richmond
Open house 2: Sat., Sept. 21, 1 p.m. to 4 p.m. at Surrey City Centre Library
French online session: Wed., Oct. 9, 6:30 to 7:30 p.m.
* To attend, please register by Sept. 21, 2024

Visit portvancouver.com/LandUsePlanAmendments to:

- Register for the online sessions
- Find details on the open houses
- Read the proposed amendments and land use plan
- Complete the online questionnaire by November 8, 2024

PORT de Vancouver | Administration portuaire
Vancouver-Fraser

Modifications proposées au plan d'utilisation des sols
Période pour participer
Du 9 septembre au 8 novembre 2024

L'Administration portuaire Vancouver-Fraser a l'intention de modifier son plan d'utilisation des sols pour retirer un site déchu et désigner trois sites acquis au cours de la dernière année, un à Richmond et deux autres à Surrey. Le plan d'utilisation des terres de l'administration portuaire propose que les sites nouvellement acquis soient désignés comme « industriels ».

Comment participer

Assitez à une séance en ligne ou en personne à l'une de nos journées portes ouvertes :

Séance en ligne en anglais : mercredi 11 septembre, de 18 h 30 à 19 h 30.
Journée portes ouvertes 1 : mercredi 18 septembre, de 17 h à 20 h au Holiday Inn Express & Suites Riverport Richmond.
Journée portes ouvertes 2 : samedi 21 septembre, de 13 h à 16 h, à la bibliothèque du Surrey City Centre.
Séance en ligne en français : mercredi 9 octobre, de 18 h 30 à 19 h 30.
Pour participer, veuillez vous inscrire d'ici le 21 septembre 2024.

Consultez portvancouver.com/AmendementsPlanUtilisationDesSols pour :

- Vous inscrire aux séances en ligne
- Obtenir des détails sur les journées portes ouvertes
- Consulter les modifications proposées et le plan d'utilisation des sols
- Remplir le questionnaire en ligne d'ici le 8 novembre 2024

Richmond News (online), August 26-30, 2024

A screenshot of the Vancouver News Now website. The header features the station's logo with "NEWS NOW" in large letters and "1070 AM" above it. Below the logo is a navigation bar with links for "News", "Opinion", "Arts & Life", "Business", "Politics", "Ottawa", "Comment", and "Bend of Richmond". To the right of the navigation is a search bar with placeholder text "Search or type your question here" and a magnifying glass icon. Below the search bar is a weather forecast for Vancouver: "16°C" with a sun icon and a "Get forecast" button. The main content area has a yellow banner at the top with the text "Land use plan amendment Public engagement September 4 to November 4" and a "Continue" button. Below the banner, there are two news articles. The first article, titled "Port of Vancouver to propose land-use plan amendment", includes a thumbnail image of a port facility, a brief summary, and a "Read more" link. The second article, titled "Baldrick: \$58-deficit? No surprise for B.C.", includes a thumbnail image of a person, a brief summary, and a "Read more" link. At the bottom left is a "Local News" section with a thumbnail for a story about a man who died after being hit by a car.

Prince George police stumble on biggest drug haul in city's history

According to the officers involved, it was a "small-scale or other type of investigation" and not in the "biggest sense of the word," says one of the officers involved.

RCMP say the officers were investigating a "small-scale" drug operation in Prince George when they came across the "large-scale" drug operation on the perimeter.

The officers say they were "abducted" and "detained" before being allowed to leave, according to a statement from the Canadian Press, which describes the encounter as "extremely threatening."

RCMP say the officers involved in the investigation are not identified, and the investigation is ongoing.

2

Oversight agency investigating after man shot, officer injured in Richmond

Richmond police officers have been investigating a shooting at a residential unit in the city's northeast corner since last month.

Officers also seized more than \$1 million in cash and drugs during the investigation, which began in late August.

Local media reported the shooting happened in a residential unit in the 1000 block of 104th Street. Officers responded to a call about a man who had been shot at about 10:30 p.m. on Aug. 27.

The victim, a male in his 20s, was taken to hospital with non-life-threatening injuries.

RCMP say the investigation is continuing, and no charges have been laid.

Crime of the Week

Shots fired at car

Sunday RCMP is investigating shooting incidents in the city's northeast corner. In the first incident, a man was shot at 7:30 p.m., apparently responding to a disturbance in the 1000 block of 104th Street. In the second, shots were fired at a vehicle in the 1000 block of 104th Street around 10:30 p.m.

RCMP say the two incidents are believed to be related.

Incidents like these fuel the "Crime of the Week" column. If you have information about a recent crime, contact the [Vancouver Crime Stoppers](http://www.vancouvercrimestoppers.com), or email info@vancouvercrimestoppers.com.

Vancouver Fraser Port Authority
Public backgrounder | 2024 Land use plan amendments

The "Industrial" designation, as defined in our land use plan, is intended for light to heavy industrial activities in support of port operations and marine support services, including goods shipping, transportation, handling, and, in some cases, manufacturing. Primary uses may include intermodal yards, warehouses, container storage facilities, transloading facilities, ship repair, and barge moorage activities. Ancillary uses may include offices, storage areas, and other users required to support the primary use.

How will the sites be used in the future?

The newly acquired sites are anticipated to be used for trade-oriented industrial development and supporting infrastructure. Any proposals for future development would be subject to the port authority's [Project and Environmental Review process](#) and must conform to the uses permitted under the land use plan.

How is the public being notified?

The procedure to amend the land use plan and designate lands is set out in the [Canada Marine Act](#), [Section 48](#). This section of the Act also includes requirements for public engagement. The port authority is required to advertise in newspapers and host a public meeting at least 60 days prior to adopting the plan or making substantive amendments.

The port authority will advertise in local papers and on social media, notify neighbours in the surrounding areas of the opportunity for input via maildrop, send out notifications to municipalities and stakeholders. We will hold two in-person open houses and an online session in English. Should there be registration, an online session will also be held in French.

How are First Nations being engaged?

The port authority will engage First Nations on the proposed land use designation changes. First Nations engagement for the land use plan will run concurrently with stakeholder and public engagement activities and will provide 60 days for comment, as identified in the Canada Marine Act.

Any future proposed projects located on the sites will go through a [Project and Environmental Review](#) process which includes consultation with First Nations.

How can I participate?

The public engagement period runs from **September 9 to November 8, 2024**. We encourage you to learn about the proposed amendments on our website at portvancouver.com/LandUsePlanAmendments.

You can provide your feedback by attending our in-person open houses or our online sessions, completing the online questionnaire, or sending an email to LandUsePlan@portvancouver.com.

Vancouver Fraser Port Authority Public backgrounder 2024 Land use plan amendments																																			
Why did the port authority acquire this land?																																			
As trade growth continues, we acquire land to support future port-related activities. We focus on sites with easy access to shipping channels, truck routes, or rail corridors. Making land acquisitions is one of the ways to ensure the Port of Vancouver is ready to handle growing trade.																																			
What are the sites currently being used for?																																			
The Richmond site is currently vacant.																																			
The Surrey sites are currently being used as a temporary truck/chassis parking.																																			
What are the proposed amendment sites?																																			
<table border="1"> <thead> <tr> <th colspan="3">Amendment type</th></tr> <tr> <th colspan="3">Newly acquired land</th></tr> </thead> <tbody> <tr> <td>Municipality and site</td><td>Richmond</td><td>Surrey</td></tr> <tr> <td>Site location</td><td>13751 Steveston Highway</td><td>10582 and 10620 Scott Road</td></tr> <tr> <td>Site area</td><td>0.34 ha / 0.84 ac</td><td>5.08 ha / 12.56 ac</td></tr> <tr> <td>Current use</td><td>Vacant</td><td>Temporary truck/chassis parking</td></tr> <tr> <td>Anticipated future use</td><td>To be consolidated with existing port authority property to facilitate industrial warehouse development</td><td>Large format logistics warehouse</td></tr> <tr> <td>Former municipal zoning</td><td>IL – Light Industrial and CEA – Entertainment & Athletics</td><td>General Agriculture (A-1)</td></tr> <tr> <td>Former municipal land use designation</td><td>Industrial and commercial</td><td>Mixed employment</td></tr> <tr> <td>Proposed land use designation</td><td>Industrial</td><td>Industrial</td></tr> <tr> <td>Date of acquisition/tenure agreement</td><td>July 13, 2023</td><td>10582 – June 11, 2024 10620 – June 17, 2024</td></tr> </tbody> </table>			Amendment type			Newly acquired land			Municipality and site	Richmond	Surrey	Site location	13751 Steveston Highway	10582 and 10620 Scott Road	Site area	0.34 ha / 0.84 ac	5.08 ha / 12.56 ac	Current use	Vacant	Temporary truck/chassis parking	Anticipated future use	To be consolidated with existing port authority property to facilitate industrial warehouse development	Large format logistics warehouse	Former municipal zoning	IL – Light Industrial and CEA – Entertainment & Athletics	General Agriculture (A-1)	Former municipal land use designation	Industrial and commercial	Mixed employment	Proposed land use designation	Industrial	Industrial	Date of acquisition/tenure agreement	July 13, 2023	10582 – June 11, 2024 10620 – June 17, 2024

All proposed amendments are available for review and feedback online at portvancouver.com/LandUsePlanAmendments.

What will you do with the feedback and how will the results be shared?

We will be compiling all feedback and summarizing key themes in an engagement summary and consideration report, which will be posted on portvancouver.com/LandUsePlanAmendments and on our website after the close of the engagement period. We will also directly notify those who subscribed to our land use plan email list. To join this mailing list, please click here: portvancouver.com/new-and-media-newsletter/.

The engagement summary and consideration report will describe how we responded to the feedback received. It will also be provided to the port authority's board of directors for review to inform their decision on the proposed amendments.

How will the decision from the board of directors be shared?

Should the port authority's board of directors approve the proposed amendments, the notice of decision would be distributed through advertisements in local newspapers and emailed to those subscribed to our land use plan email list. The notice of decision and amended land use plan maps will also be published on our website portofcalifornia.ca.gov/land/land_use_planning/.

vancouver | Vancouver Fraser
Port Authority

Document d'information public
2024 Modification du plan d'utilisation des sols

Qu'est-ce qu'un plan d'utilisation des sols?
Toutes les administrations portuaires du Canada sont tenues de disposer d'un [plan d'utilisation des sols](#), qui est un document stratégique de haut niveau et un cadre destiné à orienter le développement des terres et des eaux gérées par l'administration portuaire pour les 15 à 20 prochaines années. Il précise les types d'utilisations qui conviennent aux différentes zones qui relèvent de l'administration portuaire. Le conseil d'administration de l'Administration portuaire Vancouver-Fraser a adopté le plus récent [plan d'utilisation des sols](#) en décembre 2020.

Que comprend le plan d'utilisation des sols?
Le plan d'utilisation des sols comprend des objectifs, des politiques et des désignations d'utilisation des sols pour guider la planification dans tous les aspects de notre compétence. Il permet aux Premières Nations, aux parties prenantes, aux résidents voisins et aux collectivités de mieux comprendre les activités portuaires et les utilisations qui peuvent avoir lieu sur les terres et les eaux fédérales gérées par l'administration portuaire. Notre plan d'utilisation des sols comprend huit désignations différentes qui portent autant sur les utilisations terrestres que maritimes.

Pourquoi modifier le plan d'utilisation des sols?
De long terme à autre, l'administration portuaire achète de nouveaux terrains, conclut un contrat de location à long terme avec un propriétaire foncier, redésigne des propriétés existantes de l'administration portuaire ou cède des propriétés existantes de l'administration portuaire. Ces achats, contrats de location, changements de désignation et cessions nécessitent la modification de notre plan d'utilisation des sols, ce qui implique une période de participation du public et l'approbation du conseil d'administration de l'administration portuaire. Pour de telles modifications, la [Loi maritime du Canada](#) définit les exigences procédurales en matière d'avis public, de consultation et d'adoption par notre conseil d'administration.

Au cours de la dernière année, nous avons cédé une partie de l'entreprise routière à Vancouver et acquis trois sites, un à Richmond et deux à Surrey. La [Loi maritime du Canada](#) exige que nous ajoutions ces terrains à notre plan d'utilisation des sols au moyen d'une modification et que nous leur attribuions une désignation d'utilisation par l'administration portuaire.

Pourquoi l'administration portuaire a-t-elle cédé le terrain à Vancouver?
Le site cédé était situé au 1299 Powell Street, à Vancouver. Il avait une superficie de 35 m² (0,0035 hectare ou 0,0086 acre) et était utilisé comme emprise routière. Le site a fait partie d'un échange

2024-08-01 | Page 1

Administration portuaire Vancouver-Fraser
Document d'information public | 2024 Modification du plan d'utilisation des sols

de terrains qui permettra à la ville de Vancouver de construire à proximité un pont d'étagement pour véhicules et piétons afin d'atténuer des conflits entre trafic routier et ferroviaire.

Pourquoi l'administration portuaire a-t-elle acquis ce territoire?
À mesure que la croissance des échanges commerciaux se poursuit, nous faisons l'acquisition de terrains pour soutenir les futures activités portuaires. Nous privilégions les sites avec un accès facile aux voies de navigation, aux itinéraires routiers ou aux corridors ferroviaires. L'acquisition de terrains constitue un des moyens de veiller à ce que le port de Vancouver soit prêt à faire face à la croissance du commerce.

Pourquoi redesigner des sites existants de l'administration portuaire?
Nous modifions la désignation de ces sites pour mieux refléter les utilisations et les activités futures prévues dans ces deux régions et pour nous assurer que ces utilisations et activités futures sont conformes à la désignation appropriée figurant dans notre plan d'utilisation des sols.

À quoi servent présentement ces sites?
Le site de Richmond est actuellement vacant.
Les sites de Surrey sont actuellement utilisés comme stationnement temporaire pour camions et châssis.

Quels sont les sites et les modifications proposées?

Type de modification		
Terrain nouvellement acquis		
Municipalité et site	Richmond	Surrey
Emplacement du site	13751 Steveston Highway	10582 et 10620 Scott Road
Superficie du site	0,34 ha / 0,84 ac	5,08 ha / 12,56 ac
Utilisation actuelle	Vacant	Stationnement temporaire pour camions et châssis
Utilisation future prévue	À regrouper avec des terrains actuels de l'administration portuaire pour favoriser l'aménagement d'entreports industriels	Entrepôt logistique de grand format
Ancien zonage municipal	IL – Industriel léger et CEA – Divertissement et athlétisme	Agriculture générale (A-1)

Administration portuaire Vancouver-Fraser
Document d'information public | 2024 Modification du plan d'utilisation des sols

Type de modification		
Terrain nouvellement acquis		
Municipalité et site	Richmond	Surrey
Ancienne désignation municipale d'utilisation des terres	Industriel et commercial	Utilisation mixte
Désignation du plan d'aménagement proposé	Industriel	Industriel
Date de l'accord d'acquisition/ d'occupation	13 juillet 2023	10582 – 11 juin 2024 10620 – 17 juin 2024

Quelles sont les désignations proposées pour ces sites?
La désignation de site « industriel » a été proposée pour le site acquis à Richmond.
La désignation de site « industriel » a été proposée pour les deux sites à Surrey.

La désignation « **industriel** », telle que définie dans notre plan d'utilisation des sols, est destinée aux activités industrielles légères à lourdes qui soutiennent les opérations portuaires et les services de soutien maritime, y compris l'expédition de marchandises, le transport, la manutention et, dans certains cas, la fabrication. Les utilisations principales peuvent être des chantiers intermodaux, des entrepôts, des installations de stockage de conteneurs, des installations de transbordement, des activités de réparation navale et d'amarrage de barges. Les utilisations accessoires peuvent comprendre des bureaux, des aires d'entreposage et d'autres utilisations nécessaires pour soutenir l'utilisation principale.

Comment les sites seront-ils utilisés à l'avenir?
Les sites nouvellement acquis devraient être utilisés pour le développement industriel orienté sur le commerce et les infrastructures de soutien. Toute proposition de développement futur serait assujettie au [processus d'examen des projets et de l'environnement](#) de l'administration portuaire et devra se conformer aux utilisations autorisées en vertu du plan d'utilisation des sols.

Les sites redésignés devraient être utilisés pour l'agrandissement d'une marina dans la circonscription électorale A et pour le dépôt de matériaux de construction et d'équipements, ainsi que pour le chargement et le déchargement de barge pour appuyer les activités des locataires sur les sites adjacents de Coquitlam.

Comment le public est-il avisé?
La procédure pour modifier le plan d'utilisation des sols et désigner les terrains est décrite dans la [Loi maritime du Canada Article 48](#). Cet article de la Loi comprend également des exigences en matière de participation du public. L'administration portuaire est tenue de publier des annonces dans les journaux et d'organiser une réunion publique au moins 60 jours avant d'adopter le plan ou d'y apporter des modifications substantielles.

Administration portuaire Vancouver-Fraser
Document d'information public | 2024 Modification du plan d'utilisation des sols

L'administration portuaire achètera de la publicité dans les journaux locaux et sur les médias sociaux, informera les voisins des aires environnantes de la possibilité d'apporter leur contribution au moyen de Maildrop, enverra des notifications aux municipalités et aux parties prenantes. Nous organiserons deux journées portes ouvertes en personne et une séance en ligne en anglais. Si les inscriptions sont suffisantes, une séance en ligne aura également lieu en français.

Comment se fera la participation des Premières Nations?
L'administration portuaire sollicitera la participation des Premières Nations en ce qui concerne les changements proposés dans la désignation de l'utilisation des sols. La participation des Premières Nations en ce qui concerne le plan d'utilisation des sols se déroulera en même temps que les activités de participation des parties prenantes et du public. Comme le stipule la [Loi maritime du Canada](#), une période de 60 jours est prévue pour la formulation de commentaires.

Tout projet proposé sur les sites fera l'objet d'une procédure d'[examen environnemental du projet](#) qui comprendra la participation des Premières Nations.

Comment puis-je participer?
La période de participation du public s'étend du **9 septembre au 8 novembre 2024**. Nous vous encourageons à vous renseigner sur les modifications proposées sur notre site Web à l'adresse [portvancouver.com/AmendementsPlanUtilisationDesSols](#).

Vous pouvez donner votre avis en participant à nos journées portes ouvertes en personne ou notre séance d'information en ligne, en remplissant le questionnaire en ligne ou en envoyant un courriel à plandutilisationdesolls@portvancouver.com.

Territory acknowledgement

For thousands of years, Coast Salish First Nations have lived and prospered in the south coast of British Columbia, with complex systems for trade and commerce, long before settlers arrived and recognized this area as an ideal trading region.

The Vancouver Fraser Port Authority acknowledges that the proposed land use plan amendments and the open houses to discuss them are located within the territories of a number of Coast Salish peoples, and we would like to extend our thanks to those Nations.

The port authority acknowledges that its Canada Place office sits on the traditional territory of the x̣məθkʷəy̥əm (Musqueam), Skwxwú7mesh (Squamish), and səl̓ílwətaɬ (Tsleil-Waututh) Nations.

We recognize the ongoing presence and resilience of Indigenous Peoples in this territory and commit to working collaboratively with them to ensure the protection of their rights, culture, and traditional practices. We express our gratitude for the opportunity to live, work, and operate on these lands.

PORT of Vancouver | Vancouver Fraser Port Authority

Canada

Vancouver Fraser Port Authority

Our mandate, as outlined in the *Canada Marine Act*, is to enable Canada's trade objectives on behalf of all Canadians, ensuring goods are moved safely through the Port of Vancouver, while protecting the environment and considering local communities.

Like all Canada Port Authorities, the Vancouver Fraser Port Authority was established by the Government of Canada pursuant to the *Canada Marine Act*, and is accountable to the federal minister of transport. We are responsible for managing federal port lands and waters in the Port of Vancouver.

In fulfilling our mandate under the *Canada Marine Act*, we carry out a variety of duties:

- Safety and security
- Real estate management
- Transportation
- Communication, engagement, and collaboration
- Customer services
- Environmental reviews and permitting
- Planning
- Infrastructure development

PORT of Vancouver | Vancouver Fraser Port Authority

Canada

Our jurisdiction

The Vancouver Fraser Port Authority manages more than:

- 16,000** hectares of water
- 1,500** hectares of land
- approximately **350** kilometres of shoreline within the Port of Vancouver

We border:

- 29** major marine cargo terminals
- 16** municipalities and intersect the traditional territories and treaty lands of 35 Coast Salish First Nations

We are home to:

- 3** Class 1 railroads

A full range of facilities and services to the international shipping community

Our jurisdiction

PORT of Vancouver | Vancouver Fraser Port Authority

Canada

What is the land use plan?

- Communicates our long-term land use policy directions
- Guides land use and future growth opportunities
- Assists our tenants and customers in identifying areas to locate or expand
- Facilitates coordination of land use and transportation planning
- Provides neighbouring communities with greater clarity about activities and uses that can occur on port authority lands and waters and how community interests will be considered
- Provides First Nations with clarity about land use and activities on port authority lands and waters adjacent to their reserves, and within their asserted traditional territories and treaty lands
- Illustrates our ability to accommodate growth in a socially, environmentally, and economically responsible way

The land use plan provides a framework to manage growth and development on port lands and waters over the next 15 to 20 years.

PORT of Vancouver | Vancouver Fraser Port Authority

Land Use Plan

Canada

11. Open house boards, continued

Land and water designations

The land use plan includes eight different land and water designations, which guide the development and management of the areas within port lands and waters, and provide clarity on long-term development.

- Port terminal**
Port terminal areas are primarily designated for deep-sea marine and river terminals that handle a variety of cargo, including automobiles, breakbulk, dry bulk and liquid bulk cargo, and containers, as well as cruise passengers. This includes primary trade-related uses that support shipping, transportation, handling, and, in some cases, manufacturing. Primary uses may include intermediate yards, warehouse, container storage, transhipment facilities, ship repair, and barge moorage activities. Ancillary uses may include offices, storage areas, caretaker facilities, and other uses required to support the primary use.
- Industrial**
Industrial areas are primarily designated for light to heavy industrial activities in support of port operations and marine support services, including goods shipping, transportation, handling, and, in some cases, manufacturing. Primary uses may include intermediate yards, warehouse, container storage, transhipment facilities, ship repair, and barge moorage activities. Ancillary uses may include offices, storage areas, caretaker facilities, and other uses required to support the primary use.
- Commercial**
Commercial areas are primarily designated for commercial activities related to port or marine support services, tourism-related businesses, transportation of passengers, and the handling and storage of goods. Primary uses may include intermediate yards, warehouse, container storage, transhipment facilities, and tourism-related businesses. Ancillary uses may include offices, storage areas, caretaker facilities, and other uses required to support the primary use.

Log storage and barge moorage
Log storage and barge moorage are primarily designated for log storage, barge moorage, and associated activities.

Recreation
Recreation areas are primarily designated for public recreational use such as parks and viewing areas.

Conservation
Conservation areas are primarily designated for habitat conservation, enhancement, restoration, habitat for project offsetting or banking for future offsetting, and similar uses, and may be publicly accessible. These areas are generally not intended for development.

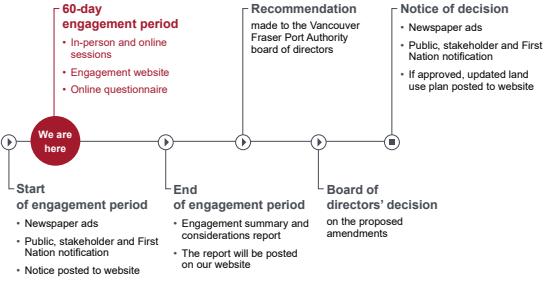

Port water
Port water areas are primarily designated for shipping, navigation, moorage, and anchorage in open water and foreshore areas adjacent to port and non-port lands.

Special study area
Special study areas are sites that require additional study, consultation, and planning to determine their future use through a land use plan amendment. Further analysis can be completed if the current use remains unchanged.

 PORT of Vancouver | Vancouver Fraser Port Authority 

How is the land use plan amended?

Under the *Canada Marine Act*, the port authority must amend its land use plan to remove any divested land, add newly acquired sites or change the designation on existing lands. The formal amendment process requires public notification and engagement.

 PORT of Vancouver | Vancouver Fraser Port Authority 

Why are we amending the land use plan?

Over the past year, we have acquired three sites. One site in the City of Richmond, and two sites in the City of Surrey.

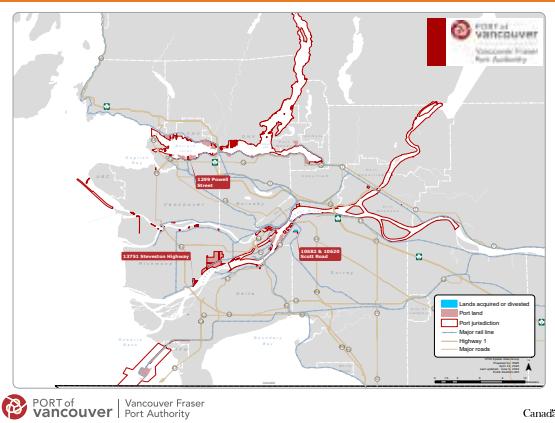

The proposed port authority land use designation for these acquired sites are:

- **13751 Steveston Highway, Richmond**
Proposed designation "Industrial"
Former municipal designations "Industrial" and "Commercial"
- **10582 and 10620 Scott Road, Surrey**
Proposed designation "Industrial"
Former municipal designation "Mixed employment"

We have also divested a portion of road allowance adjacent to 1299 Powell Street, Vancouver

 PORT of Vancouver | Vancouver Fraser Port Authority 

Proposed amendment sites

A map of the Vancouver area showing proposed amendment sites. The map highlights specific locations with red boxes and labels: "13751 Steveston Highway" and "10582 & 10620 Scott Road". A legend in the bottom right corner identifies symbols for "Area(s) acquired or divested", "Port land", "Port jurisdiction", "Major rail line", "Major road", and "Minor road".

Bienvenue
Vancouver-Fraser
Administration portuaire
Modification du plan d'utilisation des sols
Journée portes ouvertes 2024

PORT de Vancouver | Administration portuaire Vancouver-Fraser

Canada

Reconnaissance territoriale

Les Premières Nations Salish du littoral vivent sur la côte sud de la Colombie-Britannique depuis des milliers d'années. Elles ont prospéré grâce à des systèmes complexes d'échange et de commerce bien avant l'arrivée des pionniers qui considéraient cette région comme un endroit idéal pour le commerce.

L'Administration portuaire Vancouver-Fraser reconnaît que les modifications proposées du plan d'utilisation des sols et les journées portes ouvertes qui permettent d'en discuter sont situés sur les territoires d'un certain nombre de Nations Salish du littoral, et nous tenons à remercier ces Nations.

L'Administration portuaire reconnaît que son bureau de la Place du Canada se trouve sur le territoire traditionnel des nations xʷməθkʷəy̓em (Musqueam), Sḵwxwú7mesh (Squamish), et səl̓ílwətaɬ (Tsleil-Waututh).

Nous reconnaissons la présence et la résilience des peuples autochtones sur ce territoire et nous nous engageons à travailler en collaboration avec eux pour garantir la protection de leurs droits, de leur culture et de leurs pratiques traditionnelles. Nous sommes reconnaissants d'avoir la possibilité de vivre, de travailler et d'exercer nos activités sur ces terres.

PORT de Vancouver | Administration portuaire Vancouver-Fraser

Canada

Administration portuaire Vancouver-Fraser

Notre mandat, tel que défini dans la *Loi maritime du Canada*, consiste à permettre la réalisation des objectifs commerciaux du Canada au nom de toute la population canadienne, en veillant à ce que les marchandises soient transportées en toute sécurité dans le port de Vancouver, tout en protégeant l'environnement et en tenant compte des collectivités locales.

Comme toutes les administrations portuaires canadiennes, l'Administration portuaire Vancouver-Fraser a été créée par le gouvernement du Canada en vertu de la *Loi maritime du Canada* et elle relève du ministre fédéral des Transports. Nous sommes responsables de la gestion des terrains et des eaux portuaires fédérales dans le port de Vancouver.

Dans le cadre du mandat qui nous est confié en vertu de la *Loi maritime du Canada*, nous exécutons diverses fonctions :

- Sûreté et sécurité
- Gestion immobilière
- Transport
- Communication, engagement et collaboration
- Services à la clientèle
- Examens environnementaux et permis
- Planification
- Développement des infrastructures

PORT de Vancouver | Administration portuaire Vancouver-Fraser

Canada

Notre compétence

L'administration portuaire Vancouver-Fraser gère plus de :

16,000 hectares d'eau

1,500 hectares de terres

environ **350** kilomètres de rivage dans le port de Vancouver

Nous sommes situés en bordure de :

16 municipalités qui recourent les territoires traditionnels et les terres visés par un traité de 35 Premières Nations Salish du littoral

Nous accueillons notamment :

29 terminaux maritimes importants

3 chemins de fer de classe 1

Une gamme complète d'installations et de services pour le monde maritime international

Notre compétence

PORT de Vancouver | Administration portuaire Vancouver-Fraser

Canada

Quel est l'objectif du plan d'utilisation des sols?

- Communiquer nos orientations politiques à long terme en matière d'aménagement du territoire
- Orienter l'utilisation des terres et les occasions de croissance future
- Aider nos locataires et nos clients à identifier les aires pour s'établir ou agrandir
- Faciliter la coordination de l'utilisation du territoire et de la planification des transports
- Assurer une plus grande transparence aux communautés voisines à propos des activités qui ont lieu sur les terres et les eaux de l'Administration portuaire et de la façon dont les intérêts de la communauté seront pris en compte
- Renseigner les Premières Nations de façon transparente concernant l'utilisation des sols et les activités par l'Administration portuaire sur les terres et les eaux adjacentes à leurs réserves et à l'intérieur de leurs territoires traditionnels revendiqués et de leurs terres visées par un traité.
- Démontrer notre capacité à répondre à la croissance d'une manière responsable sur le plan social, écologique et économique

Le plan d'utilisation des sols fournit un cadre pour gérer la croissance et le développement des terres et des eaux portuaires au cours des 15 à 20 prochaines années.

PORT de Vancouver | Administration portuaire Vancouver-Fraser

Désignations de terres et d'eaux

Le plan d'utilisation des sols comprend huit désignations différentes de terres et d'eaux qui guident le développement et la gestion des aires situées à l'intérieur des terres et des eaux portuaires, et explique leur développement à long terme de façon transparente.

- Terminaux portuaires**
- Secteurs commerciaux**
- Entreposage des billes et mouillage des barges storage and barge moorage**
- Secteurs récréatifs**

PORT de Vancouver | Administration portuaire Vancouver-Fraser Canada

Désignations de terres et d'eaux

- Conservation**
- Eaux portuaires**
- Zones d'étude particulières**

PORT de Vancouver | Administration portuaire Vancouver-Fraser Canada

Comment le plan d'utilisation des sols est-il modifié?

En vertu de la Loi maritime du Canada, l'autorité portuaire doit modifier son plan d'occupation des sols afin de supprimer tout terrain cédé, d'ajouter des sites nouvellement acquis ou de modifier la désignation des terrains existants. La procédure officielle de modification nécessite la notification et la participation du public.

PORT de Vancouver | Administration portuaire Vancouver-Fraser Canada

Pourquoi modifions-nous le plan d'utilisation des sols?

Au cours de la dernière année, nous avons fait l'acquisition de trois sites. Un site se trouve dans la ville de Richmond et les deux autres, dans la ville de Surrey.

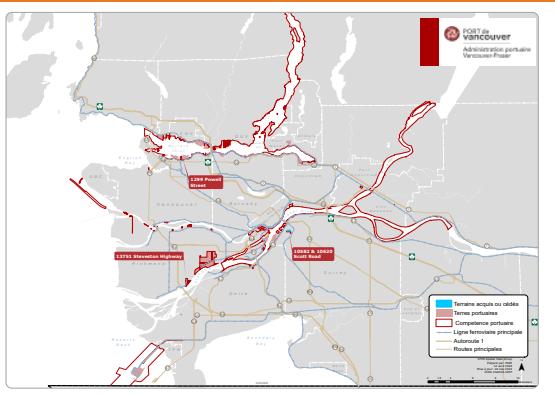

Voici la désignation proposée par l'administration portuaire pour l'utilisation de ces sites nouvellement acquis :

- 13751 Steveston Highway, Richmond**
Désignation proposée : « industriel »
Anciennes désignations municipales : « industriel » et « commercial »
- 10582 et 10620 Scott Road, Surrey**
Désignation proposée : « industriel »
Ancienne désignation municipale : « utilisation mixte »

Nous avons également cédé une partie de l'entreprise routière adjacente au 1299 Powell Street, à Vancouver.

13. Online questionnaire

The online questionnaire replicated the hard copy version in all three languages.

This screenshot shows the 'Welcome!' page of the online questionnaire. At the top, there are logos for the PORT of Vancouver Port Authority and the PORT de Vancouver Administration portuaire, both in English and French. A 'English' language selection button is also present. The main content area starts with a bold 'Welcome!' heading. Below it, a paragraph explains the engagement period from September 9 to November 8, 2024, and encourages users to review the website and supporting documents before completing the questionnaire. It also notes that feedback will be considered as part of the land use plan amendment process. A note at the bottom says to click 'Next' to continue. The 'Next' button is located at the bottom right of the page.

This screenshot shows the 'Participate!' page of the online questionnaire. The layout is identical to the previous 'Welcome!' page, with the same header and language selection. The main content area starts with a bold 'Participate!' heading. It reiterates the engagement period from September 9 to November 8, 2024, and the purpose of inviting public comments. It also states that feedback will be considered during the amendment process and that a summary report will be provided. A note at the bottom says to click 'Next' to continue. The 'Next' button is located at the bottom right of the page.

This screenshot shows the final 'Thank you!' page of the online questionnaire. The header includes the PORT of Vancouver Port Authority and PORT de Vancouver Administration portuaire logos, along with a 'English' language selection button. The main content area starts with a bold 'Thank you!' heading in English. It thanks participants for their time and effort in completing the questionnaire. A note at the bottom says to click 'Next' to continue. The 'Next' button is located at the bottom right of the page.
