

Sustainable Infrastructure

The Vancouver Fraser Port Authority is committed to our vision for the Port of Vancouver to be the world's most sustainable port. Sustainability ratings systems such as LEED and Envision are used worldwide to help apply sustainability principles and best practices to the design and construction of built infrastructure. These ratings systems provide a sustainability framework that can be used to guide the development of projects from design to construction and, in some instances, provide the opportunity to achieve a sustainability rating and certification. In order to help us understand how sustainability principles and best practices are currently being applied to development proposals within the Port of Vancouver, we require you to respond to the following questions as part of your application.

Project Details:

1. Does the project you are applying for include the use of sustainability principles and best practices that are part of a sustainability ratings system (e.g. LEED, Envision etc.)?
 - Yes
 - No
- a. If yes, please identify which sustainability ratings system is being applied. Tick the box for all that apply.
 - LEED
 - Envision
 - Other (please specify in the text box below)

- b. If no, please identify why sustainability principles and best practices are not being included in this proposal. Tick the box for all that apply.

Not required by the port authority

Not required by legislation

Not applicable to the project type

Cost is too high

Project lifespan is too short to achieve benefits

Applicant is not familiar with sustainability ratings systems

Other (please specify in the text box below)

2. If the project is using a sustainability rating system, please identify the sustainability rating level that the project is proposing to achieve:

Use of sustainability principles and best practices for project guidance

Verified/Certified (please specify in the text box below)

Other (please specify in the text box below)

- a. Please advise why the above approach was selected:

3. If you would like to provide more details or clarifications about the sustainability principles and best practices that are being applied to this project, please do so in the text box below:
