the possible zinc exceedances on Parcels A and C, the unknown origin of the site fill materials, and the fact that the Site fill materials have never been sampled for petroleum hydrocarbons, the on-Site fill materials have conservatively been identified as an APEC, and further investigation and analysis for petroleum hydrocarbons and metals (especially zinc) is warranted.

#### **Sand Piles**

Piles of sand fill were identified within or immediately down gradient of Parcel Rem-C in the PWGSC 1996 report (their exact location is not clear). The content and origin of the fill was unknown. The fill was again referred to in the 2002 Keystone report, however, these fill piles were not observed during Hemmera's 2006 Site visit. Based on historic shallow soil sampling conducted in the vicinity of the sand fill piles (which did not indicate any impacts above applicable standards), and on the fact that the fill piles were not observed during Hemmera's 2006 Site visit, the historic sand fill piles are not considered an APEC for the Brownsville Site. No other dumpsites were identified during the Phase I ESA program.

#### 3.3.6 Spill and Stain Areas

David Gray (Mill and Timber Products Ltd.) indicated that no spills or environmental incidents have occurred on the Site during their occupation of the Site.

However, the following potential spill and stain areas were identified by Hemmera during the 2006 site visit:

- Interior floor of the oil storage shed and exterior ground surface in the immediate vicinity of the shed; and
- Ground surface and wood debris directly beneath green chain.

As previously discussed, both stained areas were identified as APECs for the Brownsville Site.

#### 3.3.7 Lead and/or Lead-based Paint

Based on the age of the buildings on-Site, lead and/or lead-based paint may be present including, but not limited to the structural steel components of the sawmill.

A hazardous materials survey was not performed as part of the Phase I ESA program, therefore the presence of lead and/or lead based paint cannot be confirmed or refuted.

3.3.8 Wastewater Discharges

According to Smallwood Sawmill staff, the sawmill that is currently on Site does not and did not historically produce any wastewater discharges. No liquid industrial waste is currently generated on-Site and there is no evidence of historical liquid industrial waste discharges from the Site.

However, sanitary sewage is generated immediately down gradient of the Site by the office trailers to the northwest of Parcel A, as described further below.

3.3.9 Septic System

No septic systems were identified on the Brownsville Site during the Phase I ESA program.

The Smallwood Mills office trailer and lunchroom/washroom trailers (occupied by Smallwood Mills and Lindal Cedar) are located off-Site and northwest of Parcel A and are connected to a septic tank, which empties into a septic drain field. According to Fraser River Port Authority staff, the septic field is located approximately 40 m down gradient of the Site, near the chip fuel hopper to the southwest of the trailers. The underground storage septic tank and septic field are serviced by Newton.

3.3.10 Air Emissions

Smallwood Sawmill staff indicated that the mill does not and historically did not produce air emissions.

**3.3.11 Stressed Vegetation** 

No evidence of stressed vegetation was observed during Hemmera's 2006 Site visit.

3.3.12 Elevators, Hoists and Lifts

The Smallwood Sawmill operation on Parcel A included a log lift. No potential environmental concerns were identified with respect to the log lift.

#### 3.3.13 Sumps, Separators, Ponds, Pit's and Lagoons

No sumps, separators, ponds, pits or lagoons were identified as part of the Phase I ESA program.

#### **3.3.14** Polychlorinated Biphenyls (PCBs)

A search of the EC (Environment Canada) database indicated reports of PCB's in use on-Site (see **Section 3.2.18**). EC did not provide specific information regarding PCB usage or location. Based on the Site visit and records review, the most likely location of PCB's are the electrical transformers described below.

One (1) pole mounted transformer unit was observed on-Site (Parcel A) during the Site visit (**Photo 18** in **Appendix O**). It is not known if this transformer contains PCBs. Given that the transformer is pole-mounted, appeared to be in good condition and no surface staining was observed, it is not considered to be of environmental concern with respect to soil and groundwater at the Site.

According to Smallwood Sawmill staff, electrical components of the mill (including a transformer) are housed in a grey-brick building southeast of the mill on Parcel A (**Photo 19** in **Appendix O**). Smallwood Mills staff indicated that the building contents were inspected in 2003 at which time the transformer oil was replaced. The building was inaccessible at the time of Hemmera's Site visit; therefore the interior could not be inspected.

Additional inquiries were made to Mill and Timber Products Ltd. (owner of Smallwood Sawmills) staff (David Gray) regarding the history of the electrical building. According to Mr. Gray, there are no PCBs in the Site transformers.

#### 3.3.15 Asbestos-Containing Material (ACM)

Based on the records review and Site visit, ACM is not likely present on-Site. The holding tank for the sawmill air compressor did not contain any pipe-wrap insulation or elbows.

A hazardous materials survey was not performed as part of the Phase I ESA program; therefore the absence of ACM cannot be confirmed or refuted.

#### **3.3.16** Ozone Depleting Substances (ODSs)

Based on the records review and Site visit, no sources of ODSs were identified.

#### 3.4 Interviews

Interviews were conducted with persons knowledgeable of the current and historical activities at the Site. The following interviews were conducted:

- Mr. Nures Kara of the FRPA was interviewed to obtain information pertaining to
  the Site history during the Site visit on April 13, 2006. Mr. Kara is currently the
  manager of Environmental Services for the Fraser River Port Authority and has
  approximately eight (8) years of Site knowledge.
- Mr. Gordon Fleming of Lindal Cedar Homes was interviewed to obtain information
  pertaining to Site history. Mr. Fleming is currently the shipping supervisor for
  Lindal Cedar Homes and has approximately eight (8) years of direct Site
  knowledge.
- Mr. Dan Jones of Smallwood Sawmills was interviewed to obtain information pertaining to Site history. Mr. Jones is currently a Smallwood Sawmill manager and has approximately three (3) years of direct Site knowledge.
- Mr. Brian Pimblett of CNR Company was interviewed to obtain information
  pertaining to any records of spills or incidents related to CNR activity near the Site
  location. Mr. Pimblett (P.Eng./MBA) is an environmental engineer for the pacific
  division of CNR.
- Mr. David Gray of Mill and Timber Products Ltd. (parent company of Smallwood Sawmills) was given a list of interview questions to obtain additional information pertaining to Site history and Smallwood Sawmill activities. Mr. Gray indicated that Mill and Timber Products have not had any spills or environmental incidents at the Smallwood Sawmills site.

Documentation of the interviews is provided in **Appendix P**, and interview findings are reflected throughout this report.

#### 3.5 CONCLUSIONS AND RECOMMENDATIONS

Based on the records review, interviews and Site visit information; it was concluded that there are four (4) on-Site APECs, and three (3) off-Site APECs that could potentially impact soil and/or groundwater on-Site (**Figure 2**). The APECs and their constituents of potential concern (COPCs) are summarized in **Table 18** and **Table 19** below.

**Table 18: Summary On-Site APECs and COPCs** 

APEC No.	APEC Description	Media	COPCs	Investigation Rationale	Proposed Investigation Locations
				Extensive staining inside and outside of storage shed and unprotected drums stored outside shed, as observed by PWGSC in 1996, by FRPA in July 2000, and by Hemmera during 2006 Site visit.	
1	Oil Storage Shed	Soil and Groundwater	Petroleum Hydrocarbons	No secondary containment for drums in use inside shed.	MW06-1
				Smallwood Sawmill Ltd reportedly removed outside drums and oil-stained soil in September 2000, but extent of soil removal is unknown and many outside drums and staining are still present.	
2	Sawmill operations located on-Site (Parcels A, B, C, Rem-C, 7, and 8) from approximately 1932 to present	Soil and Groundwater	Petroleum Hydrocarbons, Metals, Chlorophenols	Specific sawmill activities/locations are not known.	MW06-1, MW06-2, MW06-3, MW06-4, MW06-5
3	Oil stains/odours observed beneath the green chain	Soil and Potentially Groundwater	Petroleum Hydrocarbons	<ul> <li>Petroleum hydrocarbon odours and potential staining were observed beneath the green chain during 2006 Site visit.</li> <li>The ground surface beneath green chain is concrete of unknown condition.</li> </ul>	SS06-1
4	Historic fill materials of unknown origin, within top 2 to 3 m below ground surface (bgs) across the Site	Soil and Potentially Groundwater	Petroleum Hydrocarbons, Metals (particularly Zinc)	<ul> <li>The age and origin of the fill materials is unknown, though the materials were likely placed on the site prior to 1932.</li> <li>Historic soil samples within the Site fill materials indicated levels of zinc above the CSR standards.</li> <li>Site fill materials have never been sampled for petroleum hydrocarbons, the primary site COPC.</li> </ul>	MW06-1, MW06-2, MW06-3, MW06-4, MW06-5

**Table 19: Summary Off-Site APECs and COPCs** 

APEC No.	APEC Description	Media	COPCs	Investigation Rationale	Proposed Investigation Locations
5	Former pentachlorophenol (PCP) spraying tank reportedly located immediately southeast of Parcel 7 (near railroad tracks).  PCP-treated wood was also stored adjacent to the Site for drying.	Soil and Groundwater	Petroleum Hydrocarbons, Chlorophenols	Identified during 1996 investigation by PWGSC, and discussed in 2000 FRPA report and 2002 Keystone report.      Stacked wood reportedly placed on supports and hand-sprayed with PCP pumped from a tank. Surface below tank was apparently asphalt paved, but the extent and condition of the historic paving is unknown. Treated products were then reportedly stored south of the railroad tracks.	MW06-4
6	Adjacent and up gradient historical industrial activities and Brownsville rail spur adjacent to Parcels A, B and C, Rem-C, 7 and 8.	Soil and Groundwater	Petroleum Hydrocarbons, Metals, Chlorophenols	<ul> <li>Milling operations or related industries have been adjacent to the Site since at least 1932, and the rail spur has been present since 1891.</li> <li>A metal depot was operated adjacent (northwest of the Site) from 1970 to 1985.</li> <li>Historical light industrial operations, including auto body repair shops, shingle production, and concrete production were located within 300 m of the Site.</li> </ul>	MW06-1, MW06-2, MW06-3, MW06-4, MW06-5
7	RV Park Diesel Spill	Soil and Groundwater	Petroleum Hydrocarbons	BC Site registry search indicated a diesel spill occurred at 11940 Old Yale Road (RV Park) in 1999. The site is currently "ACTIVE UNDER ASSESSMENT" according to BC MOE.	MW06-4, MW06-5

Based on the APECs identified during the Phase 1 ESA and outlined above, Hemmera has concluded that additional investigation through a Phase II ESA process is warranted to confirm or refute if soil and/or groundwater contamination is present at identified APECs. Five (5) monitoring well locations and one (1) surface sample location are proposed as part of a Phase 2 ESA program.

These proposed investigation locations are illustrated on **Figure 2** and described in **Tables 18** and **19** (above) in relation to each APEC.

It is also recommended that prior to the proposed property transfer, FRPA should identify and quantify the on-Site waste materials (e.g. small pieces of abandoned machinery, tires, wood pallets, scrap wood, etc.) in order to assess future disposal costs. These waste materials would not likely result in Site contamination and do not represent an immediate environmental concern, but the assumption of a property with waste materials could represent a liability to FRPA, since the cost and responsibility associated with the appropriate off-site disposal of these materials would also be assumed.

#### 4.0 STATEMENT OF LIMITATIONS

This report ("Report") was prepared by Hemmera Envirochem Inc. ("Hemmera"), for the sole benefit and exclusive use of the Fraser River Port Authority ("FRPA"). The material in it reflects Hemmera's best judgement in light of the information available to them at the time of preparing the Report. Any use that a third party makes of this Report, or any reliance on or decision made based on it, are the responsibility of such third parties. Hemmera accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions taken based on this Report.

Hemmera has performed the work as described in the Scope of Work and, made the findings and conclusions set out in this Report in a manner consistent with the level of care and skill normally exercised by members of the environmental science profession practising under similar conditions at the time the work was performed.

This Report was prepared by Hemmera for FRPA, and represents a reasonable review of the information available to Hemmera within the established Scope of Work, work schedule and budgetary constraints. It is therefore possible that currently unrecognised contamination or potentially hazardous materials may exist at the site(s) and that the levels of contamination or hazardous materials may vary across the site(s). No warranty, expressed or implied, is given concerning the presence or level of contamination on the site. The conclusions and recommendations contained in this Report are based upon applicable legislation existing at the time the Report was drafted and changes in the legislation may alter the conclusions and/or recommendations. Further, any discussion of regulatory implications is based on the applicable legislation existing at time of drafting the Report.

In preparing this Report, Hemmera has relied in good faith on information provided by others as noted in this Report, and has assumed the information provided by those individuals is both factual and accurate. Hemmera accept no responsibility for any deficiency, misstatement or inaccuracy in this Report resulting from the information provided by those individuals.

The liability of Hemmera to FRPA shall be limited to injury or loss caused by the negligent acts of Hemmera. The total aggregate liability of Hemmera related to this agreement shall not exceed the lesser of the actual damages incurred, or the total fee of Hemmera for their services rendered on this project.

### 5.0 QUALIFICATIONS OF ASSESSOR

This report was prepared by Mr. Seth Kingsbury, B.Sc., AScT, of Hemmera. Mr. Kingsbury is an environmental scientist with four years of environmental consulting experience in British Columbia, Nova Scotia, New Brunswick, P.E.I and Newfoundland and has conducted numerous Stage/Phase 1 PSI projects.

This report was managed and reviewed by Ms. Claire Lewis, P.Eng., of Hemmera. Ms. Lewis is an environmental engineer with over eight years of environmental experience in Ontario and British Columbia. Ms. Lewis has conducted numerous preliminary investigations and Phase 1 ESA projects and has a range of experience in contaminated site assessment, solid waste management, engineering design, remediation, project management and reporting.

Mr. John Taylor is the project director for this assignment, and responsible for senior report review and oversight. Mr. Taylor is a registered professional engineer and a member of the British Columbia Contaminated Site Regulation Expert Roster with 16 years of progressive experience in environmental consulting service in management and mentorship roles. His ability to adapt quickly to new situations, providing clear concise solutions, has contributed to a strong record of project management and remedial planning on contaminated sites. He has designed and managed many projects on industrial, manufacturing and chemical plant sites and within the transportation sector, and has dealt with such contaminants as metals, hydrocarbons, chlorophenols, and various other industrial by-products, in a variety of mediums; air, soils, groundwater, surface water and sediments. In the areas of remedial planning, remediation, Mr. Taylor has extensive experience in various settings and clients, including large-scale public and private sector projects.
